

GUIDE

HANK Z-WAVE SCENE CONTROLLER

The Hank Z-Wave Scene Controller HKZW-SCN01 is a nifty little button to control various scenes or devices in your smart home. It has a rechargeable battery that can last up to 6 months on one charge. This guide shows how you can include it and use it in different ways in TellDus Live!

LET'S GET STARTED!

YOU WILL NEED

-  HANK HKZW-SCN01
-  TELLSTICK ZNET LITE V1/V2
-  Z-WAVE/433.92MHZ WALL SOCKET RECEIVERS

+ 1. ADD DEVICE

1.1 live.telldus.com

1.2 live.telldus.com

Add new device wizard

Choose the location for your new device:

Home
TellStick ZNet Lite

Office
TellStick ZNet Lite

Note! This step will only be shown if you have more than one Location installed on the same account.

1.3 live.telldus.com

Add new device wizard

Select your device type:

ZWAVE

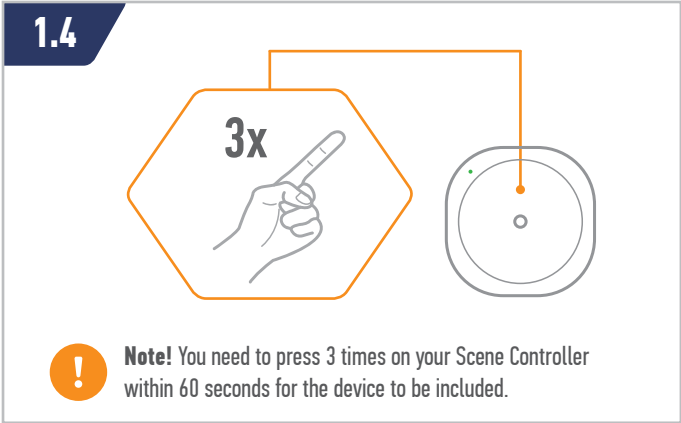

ZWAVE  **Secure**

 433,92 MHz receivers

 **Group**

Note! The types of devices you can add may vary based on what your gateway supports.

1.4

Note! You need to press 3 times on your Scene Controller within 60 seconds for the device to be included.

1.5 live.telldus.com

Add new device wizard

Choose a name for your device:

Name:

Next

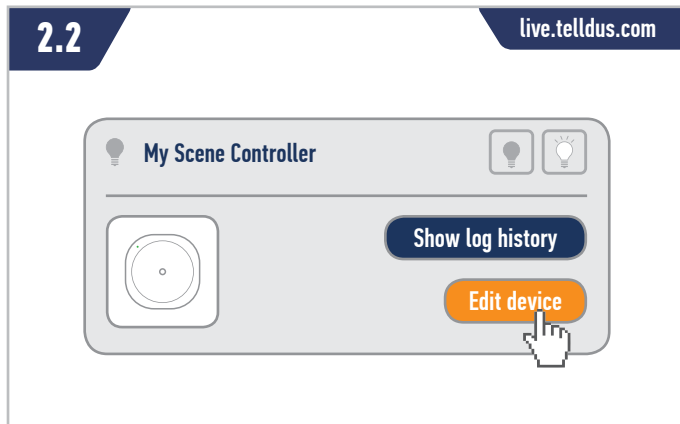

Tip! Besides the Scene Controller, this procedure is the same for most other Z-Wave devices.

2. CONTROL OTHER Z-WAVE DEVICES DIRECTLY

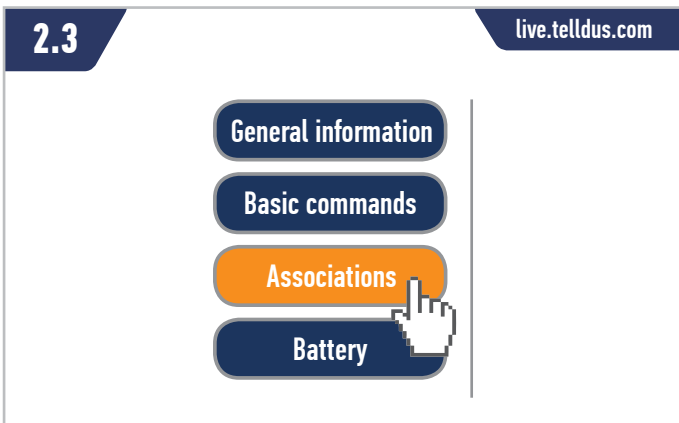

2.1 live.telldus.com

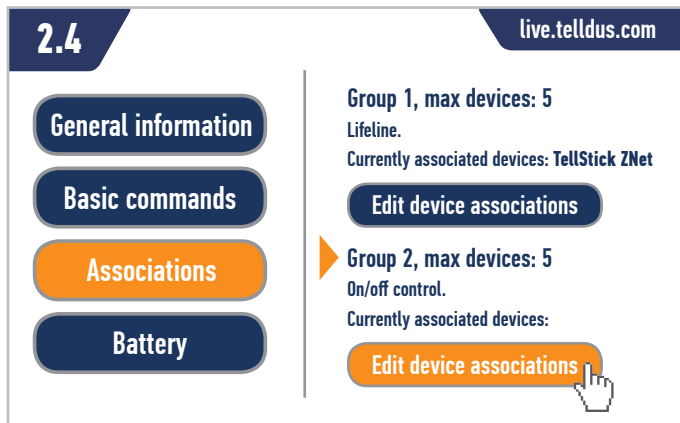

2.2 live.telldus.com

2.3 live.telldus.com

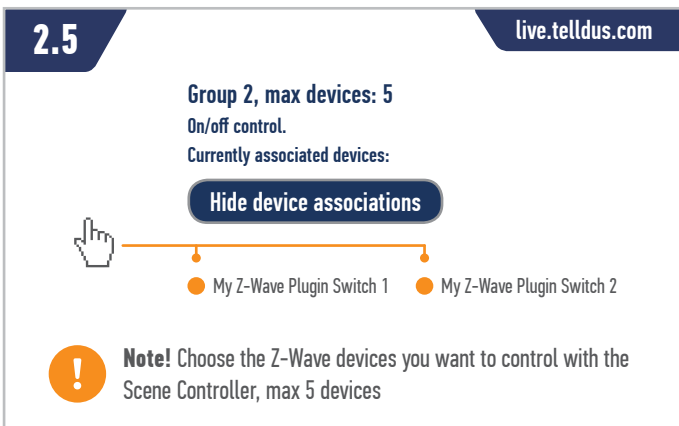

2.4 live.telldus.com

Group 1, max devices: 5
Lifeline.
Currently associated devices: TellStick ZNet

Group 2, max devices: 5
On/off control.
Currently associated devices:

2.5 live.telldus.com

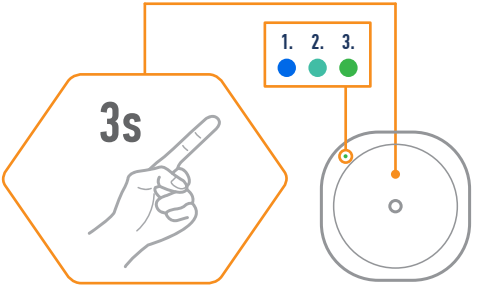

Group 2, max devices: 5
On/off control.
Currently associated devices:

Note! Choose the Z-Wave devices you want to control with the Scene Controller, max 5 devices

2.6 live.telldus.com

2.7 live.telldus.com

Note! Press and hold down the button on the Scene controller for 3 seconds, until the LED turns green, to update the settings.

2.8 live.telldus.com

● My Z-Wave Plugin Switch 1 ● My Z-Wave Plugin Switch 2 

Note! Reload the page and check that the settings are updated. If they have not been updated on the Scene Controller there will be an icon indicating that next to the device. If that is the case, repeat step 2.7-2.8 until it is updated.

Note! To control the associated devices simply press the button on the Scene Controller. The button will alternate between On and Off. The action buttons for the Scene Controller in Telldus Live! will not control the associated devices.

3. CONTROL AN EVENT WITH Z-WAVE AND 433.92MHZ DEVICES

3.15 live.tellus.com

Add device action

Choose device:

Choose action:

On Off Dim

Dim value: 65%

Add

3.16 live.tellus.com

 **Step 3.14-3.15**

Repeat step 3.14-3.15 for every device you want to control in this event.

Actions

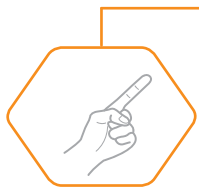

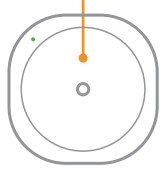

AND

AND

3.17

 **My Scene Controller**  

Note! Press the button on the Scene Controller, check in the device list that the status changes to On. The event will be triggered when the Scene Controller sends the On command.

 **Tip!** The event in this example only triggers when the Scene Controller sends "On". You can create another event with the Scene Controllers Off state as trigger, or add both On and Off as trigger in the same event to make it run every time you press the button.
