

GUIDE

CREATE A MACRO/SCENE

You can easily create macros that turns on, turns off or dims multiple devices with just a tap, soft indoor lighting, etc.

LET'S GET STARTED!

YOU WILL NEED

-  ONE OR MORE (DIMMABLE) SOCKET RECEIVERS
-  TELLSTICK NET/ZNET
-  TELLDUS LIVE!

1 live.telldus.com

live.telldus.com

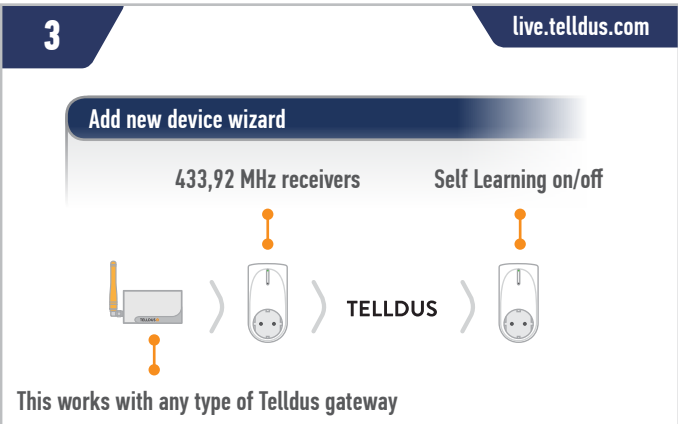

Control Devices

2 live.telldus.com

Add a new device

3 live.telldus.com

Add new device wizard

433,92 MHz receivers Self Learning on/off

TELLDUS

This works with any type of TellDus gateway

4 live.telldus.com

Add new device wizard

Name: My Scene

Next

5 live.telldus.com

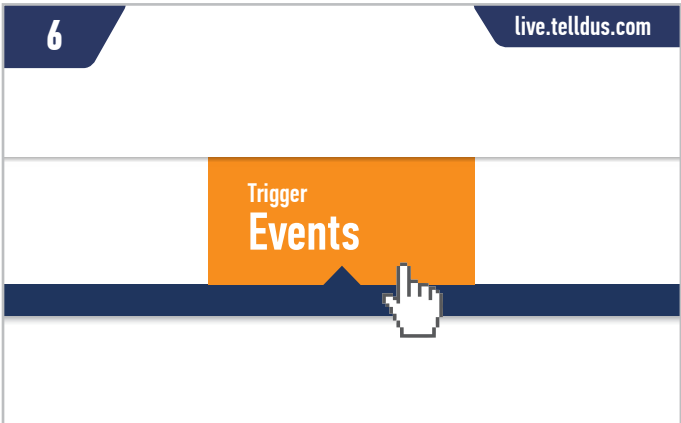

~~Learn~~

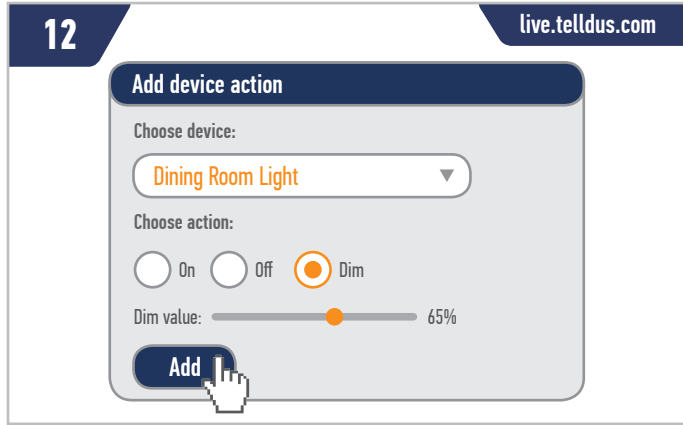

This is not an actual device and only used for controlling your device, so skip the Learn step.

Done

6 live.telldus.com

Trigger Events

 **Tip!** If you want to be able to turn the lights off using the same device, create one more event. Add a device trigger with the state "off" for your newly created device and add a device action that turns the light off.
