

**GUIDE**

# TEMPERATURE NOTIFICATION

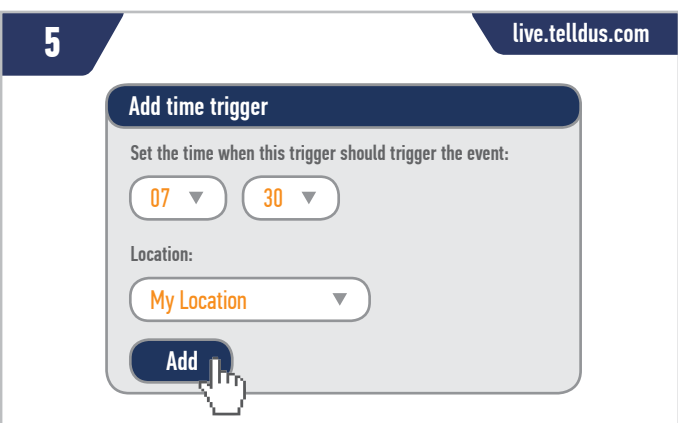

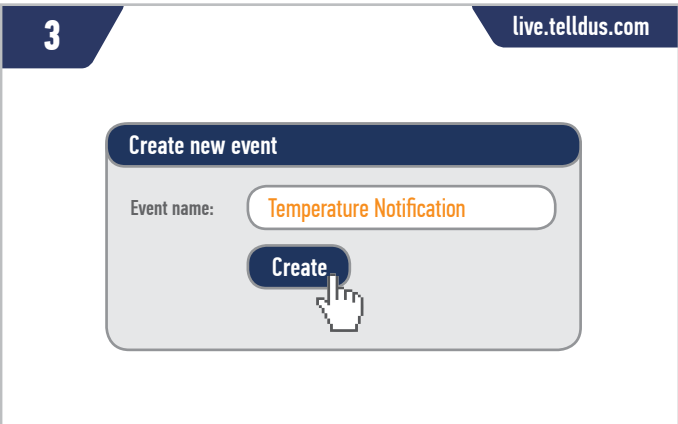

In cold weather it can help to be prepared. How about getting a notification in the morning if the temperature goes below 0°C? That way you'll be ready for it when going to work and can plan ahead for a safer commute.

## LET'S GET STARTED!

**YOU WILL NEED**

-  TEMPERATURE SENSOR
-  TELLSTICK NET/ZNET
-  TELLDUS LIVE! PRO\*

\* Optional, only needed for parts of this guide. Read more about TellDus Live! Pro at [telld.us/pro](http://telld.us/pro)

7 live.tellus.com

**Add sensor condition**

Choose sensor:

Choose threshold:

is lower than

**Add**

8 live.tellus.com

**Actions**

★ SMS action is a Tellus Live! Pro feature

9 live.tellus.com

**Add SMS action**

Phone number:

Message:

The temperature is below 0°C. Be careful on your way to work!

**Add**

★ SMS action is a Tellus Live! Pro feature

**Tip!** SMS Action is a Tellus Live! Pro feature. Although SMS is more reliable, you can use a push notification instead if you don't have Tellus Live! Pro. If you only want this notification on weekdays you can add a day condition.

## GET TELLDUS LIVE! PRO

To take full advantage of the features in Tellus Live! you need to upgrade your account to Tellus Live! Pro. This allows you to send SMS messages, emails and use many other Pro features. Read more and upgrade your account at [teld.us/pro](http://teld.us/pro)
